

IRIS DE L'EAU

MEASURE YOUR FINGER

Wrap a length of string or ribbon around the base of your finger.

To ensure a comfortable fit, we suggest measuring over your knuckle as well.

Mark the point where the string overlaps.

Measure the length in millimetres using a ruler.

Refer to the IRIS DE L'EAU size chart at the top of this page.

Locate the measurement in the first column ("Finger size MM") to determine your ring size.

TIPS

Ensure the selected size allows the ring to slide on and off comfortably.

Avoid measuring when your hands are cold or warm.

Measure your finger at the end of the day.

Each hand may differ slightly in size.

USE AN EXISTING RING

If you already have a ring that fits the intended finger, you can use it to determine your size.

- 1. Download and print the IRIS DE L'EAU ring size tool.**
- 2. Follow the instructions to find your size. If you are between two sizes, we suggest sizing up for thicker bands and down for thinner or open band styles.**
- 3. Use the IRIS DE L'EAU size chart at the top of this page. Match your measurement with the first column ("Finger size MM") to find the closest fit.**

For added comfort, we recommend revisiting your size before ordering if your hands are prone to swelling or temperature fluctuation.
